

PROCEDURES FOR CONFORMITY ASSESSMENT OF MARINE EQUIPMENT

Directive 2014/90/EU defines procedures for conformity assessment applicable at the assessment of marine equipment.

Annex II to this directive specifies the below methods of conformity assessment:

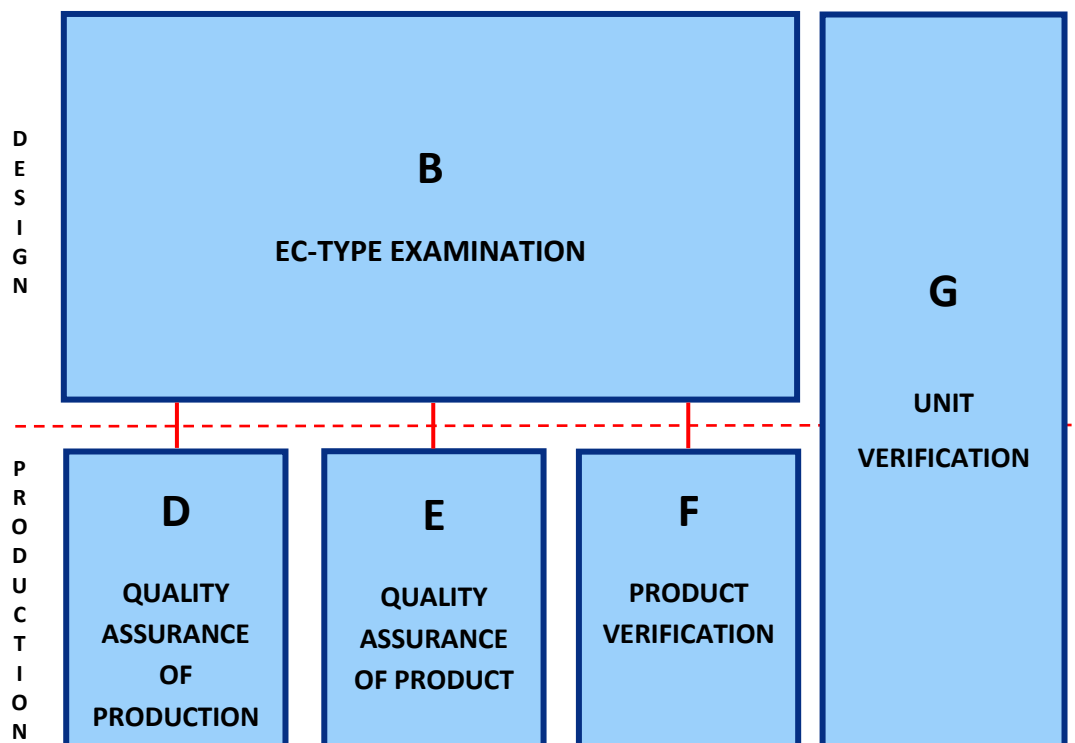

- module B – EC type examination,
- module C – conformity to type,
- module D – production quality assurance,
- module E – product quality assurance,
- module F – product verification,
- module G – unit verification,

and describes methods of proceeding for particular modules.

A notified body takes part in all modules at design, examination and production stages.

The Directive indicates combinations of modules to be applied for conformity assessment of each product: B+D or B+E, or B+F, or G. The below figure presents the combinations.

CONFORMITY ASSESSMENT PROCEDURES
